

Throughout the school year a variety of clubs are offered to the children. Clubs are used to; encourage children to join different social groupings, experience the challenge of learning a new skill, teach them about loyalty and commitment- and of course to have fun! The current clubs at Offwell are:

Sewing. Run by one of our parents, Mrs Vikki Sparks. Each week the children are busy learning sewing techniques and elements of design. Mrs Sparks is a professional seamstress and has helped the school on many occasions with quilt and banner making.

Running. Mrs Davey, our Administrator, takes the older children through their paces. She is a member of Honiton Running Club and a qualified running coach. Our children regularly take part in competitive cross country runs at Stockland primary school. They cope very well with challenging conditions.

Sports. Run by Mr Bardot our sports coach. This club is after school and the children play a huge variety of games and sports which they find exciting and fun. There is a good mix of age ranges at this club and the older children take pride in guiding the younger.

Art. Two children, Lizzie and Rubie, from our oldest class run this club for the youngest classes. They plan the activities themselves and make sure all the resources are ready. It is a very well attended club.

Ukulele. Mr Thomas our senior teacher has been teaching himself the ukulele and he was enjoying it so much he thought the children would as well. The group is hoping to perform a Christmas song.

Drawing. Mr Dunning is an excellent artist and has been helping the children with the skill of pencil and paper.

Before and after school. Each morning and on four afternoons we also offer clubs to help parents who need to get off to work. A wide mixture of fun activities is on offer including football, art, craft and ball games. The after school children also get a healthy snack and drink.

Future club plans include an opportunity for the children who will be visiting Italy and Latvia to learn a bit of the language.

So you see it is not all about Maths and English. We try to include many diverse experiences to inspire and encourage our children.
